Quick Setup Guide

Warranty Statement

Installation

Connect the included USB cable to the MiniStation's USB port.

Plug the other end of the USB cable into a USB port on the computer or device that you are adding the MiniStation to.

The MiniStation will install automatically.

Installation (Continued)

On a Windows computer, the new drive will be available in My Computer. By default it will use the first available drive letter and will be named HD-PEU2.

With a Mac, the new drive will appear on the desktop.

Format

By default, the MiniStation is formatted with FAT32, allowing it to be used with OS X, Windows, and Linux operating systems. If you're going to use it with programs that generate filesizes larger than 4GB, such as backup or video editing software, reformat the MiniStation as an NTFS drive (Windows), a Mac OS Extended drive (Mac), or an XFS drive (Linux). Backing up the MiniStation's contents before formatting is recommended.

Backup

Formatting disks will erase all information from your MiniStation. You must backup all data before proceeding.

Optional Utilities

The MiniStation includes several optional utilities.

The **TurboUSB** utility improves data transfer speeds for your MiniStation.

Disk Formatter lets you easily reformat your MiniStation.

SecureLockMobile encrypts the data on your MiniStation, preventing the data from being accessed by anyone but you.

Troubleshooting

FAQ

The following are common issues with the MiniStation. Following each issue are possible resolutions.

I've lost the utilities that were stored on my MiniStation.

You may download the utilities from www.buffalotech.com.

I cannot see the MiniStation in My Computer.

*Try a different USB port.
Verify that the hard drive inside the MiniStation is spinning. This can be verified by placing your hand on the sides of the case and feeling for a slight vibration. Also, after the MiniStation has been powered on for fifteen minutes or more it will begin to get warm. If neither of the proceeding tests verified that the hard drive is spinning, then please contact technical support for further assistance.*

My backup program can't save files to the MiniStation.

Reformat your MiniStation with NTFS, Mac OS Extended, or XFS. FAT32 is limited to 4GB filesizes.
